

Metallurgia — Index to Volume 49

JANUARY — DECEMBER 1982

A		E		Heat-treatment — news, plant, application studies 113	
Aerospace forgings-materials, processes, products 10		Economic route to furnace control ... 466		Heat-treatment of steel to combat wear, Surface 103	
Advanced technology worldwide ... 469		Education, training and contract research in metallurgy 127		Heat-treatment — plant and process in operation 447	
Advances towards the electric heat-treatment shop S18		Effective weight control boosts alloy quality 269		Heat-treatment process innovations ... 633	
Alloy quality, Effective weight control boosts 269		Electric heating, new approaches in ... 605		High technology casting for the '80s ... 265	
Alloys, Forging in light 354		Electrically-heated furnaces, control of			
Alloys spearhead titanium market development, New 259		Electricity brings economies — a guide to saving on your energy bill S5			
Aluminium, Market development — new hope for 361		Electricity — power behind the metal former's elbow S2		I	
Aluminium smelting, Pollution control costs reduced in secondary ... 364		Electroheat for metals 560		Improve the lighting — improve productivity S25	
Another circuit of Le Mans 172		Electrolytic strip galvanising line with Jet-Cell System — first in Europe ... 81		Improving the environment in the metals industry 177	
AOD refining at the heart of scrap reclamation 215		Energy management, heat recovery and recuperation 505		Industrial noise control 455	
Application of ceramic fibre modules ... 222		Energy management saves £5 million, Good 36		Industry, New materials for 250	
Automated heat-treatment facility for commercial vehicle parts 430		Energy performance, New concepts in Energy savings in the metal industries 513		Investment casting technology in Britain 534	
Automated work handling devices — recent advances 576		Environment, towards a cleaner		International trends in die-forging applications 526	
		Etchells Machinery Ltd — a century's involvement in forging equipment technology 411			
		European Castings & Forgings Exhibition 1982 Status Report 288		J	
B				Joining technology — the industrial scene 45	
Bofors enters a new generation of forgings 21					
Brass alloys, Development in the extrusion of 63		F		L	
Brass alloys, Recent progress in the development of 55		Farnborough '82 show review 544		Le Mans, Another circuit of 172	
		Forging — an overview, Open die ... 190		Light alloys 481	
		Forging conference in USA 419		Lubrication and wear in metal forming 154	
		Forging for heavy industry 213			
C		Forging of tool steel at Uddeholm Tooling 211		M	
Casting critical components 524		Forging in light alloys 354		Market developments — new hope for aluminium 361	
Ceramic fibre modules, Application of Closed die forging — an overview ... 403		Forging today — automation to forefront 569		Manufacturing plant, security in the ... 181	
Complex shapes, A fresh approach to forming 61		Forgings, Bofors enters a new generation of 21		Materials for industry, New 250	
Computer-aided design and manufacture—practical experience ... 164		Forgings—materials, processes, products, Aerospace 10		Mechanised extrusion of copper and copper alloys 375	
Conform process, Tube manufacture by the 448		Fresh approach to forming complex shapes, A 61		Melting units strongly represented at Furnaces '82 339	
Conform process, production of wire ... 584		Forming titanium in China 262		Metal finishing 83	
Continuous casting of non-ferrous metals 310		Furnace control, economic route to ... 466		Metal forming for the aerospace industry 544	
Continuous counterflow heating ... 423		Furnace industry, supplies and services in the 463		Metal forming, Lubrication and wear in Metal reclamation and recycling ... 217	
Continuous oxygen control using oxygen cell probe 461		Furnace for every purpose, a 331		Metal testing is a central theme at Fulmer Research 84	
Contract research at Harwell 139		Furnace refurbishing, Refractories in ... 228		Metal treating at reduced pressure ... 516	
Control and instrumentation 590		Furnace technology — a case for vacuum 521		Metals industry, Improving the environment in the 177	
Control of electrically-heated furnaces by means of thyristors 577		Furnace, update that 622		Metallography and microscopy — a developing science 540	
Copper and copper alloys, Mechanised extrusion of 375		Furnaces '82 demonstrates importance of low-thermal-mass refractories ... 342		Metallurgy — a progress review, Powder 301	
Copper-based alloys — progress in forming 67		Furnaces '82 — Exhibition Review ... 498		Metallurgy, Education, training and contract research in 127	
Corrosion is not a problem — but the cost of corrosion is 76		Furnaces Symposium 1982 501		Metalworking '82 144	
				Modern temperature control 582	
D		G			
Developments in handling technology in the reheating and transfer of material for metal forming ... 570		Golden Anniversary for Tin Research ... 474		N	
Developments in joining technology ... 42		Good energy management saves £5 million 36		National Centre for NDT 89	
Developments in the extrusion of brass alloys 63		Guide to plant, equipment and services S38		Net shape components for small gas turbine engines 289	
Developments in weighing technology Die-forging applications, international trends in 562				New alloys spearhead titanium market development 259	
Die forging — an overview, Open ... 190		H		New approaches in electric heating ... 605	
Die-forging, Screw presses for 28, 70		Hard coatings for improved tool life ... 160		New concepts in energy performance ... 238	
		Hardening, tempering and shrink-fitting of automobile starter ring gears ... 445		New developments in energy management, heat recovery and recuperation 505	
		Harwell, Contract research at ... 139			
		Heat-treatment facility for commercial vehicle parts 430

SPECIFY WILD BARFIELD

For Your Process Heat Treatment Equipment

A MEMBER OF
SENIOR ENGINEERING
GROUP

PIT-MOUNTED NITRIDING INSTALLATION

MANUFACTURERS OF
ELECTRIC & GAS FIRED FURNACES
GAS ATMOSPHERE GENERATORS
INDUCTION HEATING PLANT
VACUUM FURNACES, ETC.

Barlow Whitney

also members of Senior Engineering Group, recently moved from Bletchley to Watford to combine their technical and engineering resources with those of Wild Barfield. They manufacture Ovens for Stress Relieving and Annealing, Solution Treatment Plant, Impregnating Equipment for Porous Castings, etc.

Leaflets for equipments of Barlow Whitney and Wild Barfield are available on request.
